| • B-2, Package 84, Maintenance Docks (FY98) | PA: \$17.5M |
| • JOC SABRE (Facilities Maintenance Contact) | N/A |

CIVIL PROJECT DESIGN

A nighttime architectural rendering of a modern urban park. In the foreground, a winding river flows through a landscaped area with a large, multi-tiered fountain on the right. The riverbank is lined with a paved walkway and low, illuminated concrete walls. Several people are shown walking along the path. In the background, a large, multi-story city building with many lit windows stands prominently. The scene is illuminated by streetlights, building lights, and the fountain's lights, creating a vibrant urban atmosphere.

- **Site Development, Road and Utility System Design, Master Planning, Comprehensive Landscaping Plans and 3-D Site Modeling**

CULTURAL RESOURCE ANALYSIS

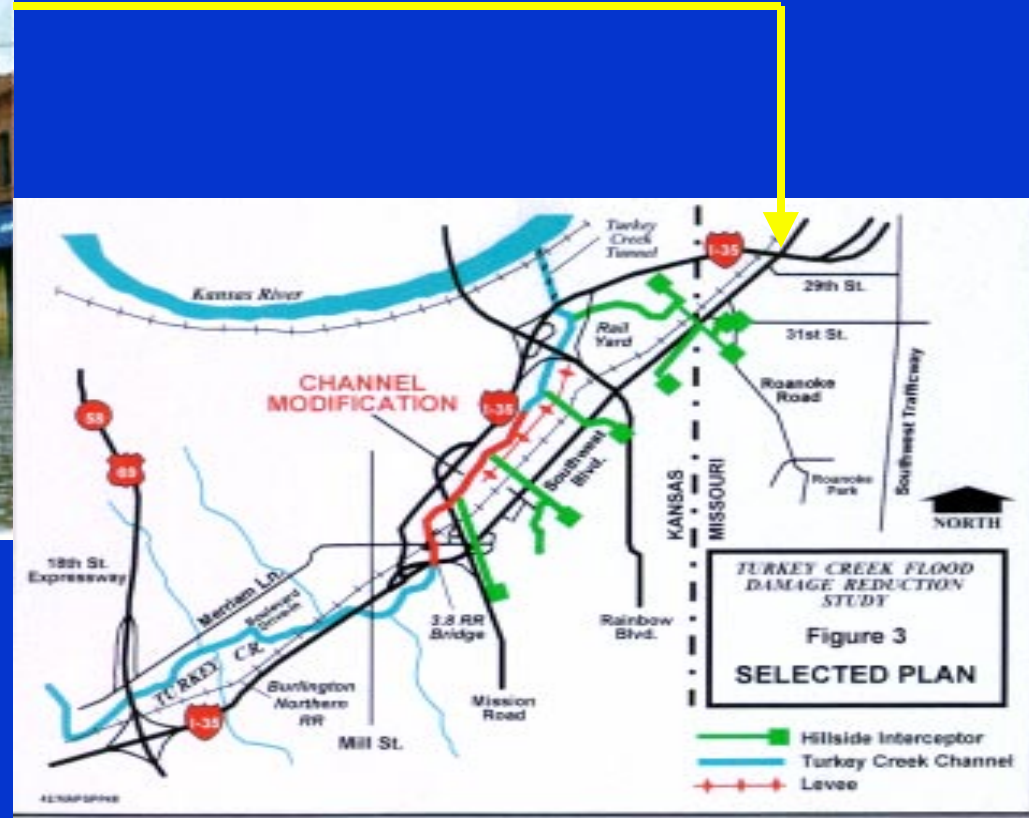

A photograph of an archaeological excavation site. In the foreground, several workers are visible. One worker in a green shirt and khaki shorts stands on the left. Another worker in a black t-shirt and khaki shorts, wearing a yellow hard hat, stands in the center. A third worker in a light blue shirt is crouching in the lower center. In the background, a large, deep excavation pit is visible, with a worker in a white shirt standing on the left side of the pit. A blue tarp is draped over the right side of the excavation. The ground is dry and sandy, and the overall scene is brightly lit.

- Cultural, Historical, Archaeological Surveys
- Impact Assessments
- Mitigation Plans

Harry S. Truman

Recreation: 13,955,865 Visitor Hours in 1997
Power Generation: 160,000 Kilowatts

HTRW

Programs/Customers

- EPA/Superfund - Regions II, IV, VII
 - Defense Environmental Restoration Program
 - FUDS
 - FUDS PRP
 - Army IRP
 - AF IRP/BRAC
 - DoD Environmental Quality
 - Federal Emergency Management Agency
 - Department of Energy
 - US Fish & Wildlife Service
 - Food and Drug Administration
- 
- The background image shows an outdoor scene with several workers in full-body yellow protective suits and white hard hats. They are standing near a large, light-colored building with many windows. There are trees with bare branches in the foreground and background, suggesting a cooler season. A yellow caution tape is strung across the middle of the scene. The overall image has a slightly grainy, low-resolution quality.

Environmental Capabilities

- One of two original Districts to execute EPA Superfund cleanups starting in 1984
- Highly experienced civil service staff
 - 140 full-time personnel dedicated to Environmental Restoration mission
- Robust contracting capability
 - \$37M in current Architect-Engineer contract capacity
 - Small Action Remedial Tool (SmART) contract for “small” projects
- Construction management infrastructure for field oversight
 - Civil service field personnel to oversee government projects

US Army Corps
of Engineers
Kansas City District

Current Programs

Environmental Restoration

- EPA Superfund - \$87M FY98
 - Work for EPA Regions II, IV, VII
- Defense Environmental Restoration Program (DERP)
 - Formerly Used Defense Sites (FUDS) - \$44M
 - Army Installation Restoration Program (IRP) - \$7M
 - Air Force IRP/Base Realignment and Closure (BRAC) - \$5M
- Support For Others - \$9.7M
 - Work for non-EPA, non-DoD agencies (Federal, State, Local)
